

PARK SENTRY®

The World's First Effective Bump-N-Go Collision Protector

Park Sentry® is a new, attractive way to add a layer of effective protection around parking structure columns. Park Sentry® adds a soft, scratch-resistant layer of protection around concrete columns, protecting both columns and vehicles from collision damage. Easily applied with few or no tools, Park Sentry® increases the visibility of the column to help avoid collisions altogether. With Park Sentry installed, vehicles can confidently park closer to the columns, virtually expanding the usable parking space.

Moulded from a thin layer of specifically engineered ARPRO® material, Park Sentry buffers the column with scratch-free padding. Park Sentry's unique design offers extra protection in the 90 degree corners where most collision damage occurs. Park Sentry can be customized to fit any square or rectangular concrete column. Ideal for car-park applications because it maximizes protection and increases parking space.

Standard kit includes: planks, corners, key-locks and straps to protect columns up to 610 x 610mm. Panels are cut down with a sharp knife to suit smaller column sizes.

Value features:

- » Modular design fits any sized 4-sided column.
- » Made from specifically engineered ARPRO® material.
- » U.V. stabilised.
- » 40mm thick plank for low-profile installation.
- » Oil, chemical, water and flame resistant.
- » Features progressive resistance technology. Resistance increases as collision force increases.
- » Mounting points for optional mechanical attachment to column.
- » Easy to install and secure.
- » Adjustable Straps: approx. 3 metres in length.
- » All components interlock on assembly.

Specifications

Description:	Car park bump protector.
Material:	Specifically engineered ARPRO® material.
Finish:	High visibility safety yellow.
Diameter:	Fits columns up to 610 x 610mm.
Height:	1 metre.
Weight:	5kg.
Installation	Simple one person installation with straps included.

Park Sentry® is manufactured from specifically engineered ARPRO® material. At just 40mm thick Park Sentry® maximises available car park space.

Corner modules are made with extra thickness and density where collisions are most likely to occur.

Each kit is supplied with a pair of 3 metre long adjustable straps.

Panel modules feature progressive resistance technology. Resistance increases as collision force increases.

PART No.	DESCRIPTION
PS-Y-KIT	Park Sentry Kit
PSS-4000-BR	Park Sentry – additional straps

Superior material protects vehicles and columns!

- » Made of ARPRO®, a high tech material specifically engineered to absorb impact.
- » Oil, chemical, water and flame resistant and 100% recyclable.
- » Thin design virtually adds space to parking structures – vehicles can now park closer to columns.
- » Interlocks at corners for edge-to-edge protection.
- » Specially designed flat panels give progressive resistance, offering soft protection for slight bumps, and more resistance when needed to absorb harder collisions.
- » Extra thickness at corners to resist damage at the most vulnerable spots.

Reduces garage maintenance, improves appearance!

- » Hides damaged columns and walls without an expensive paint job.
- » Seamless design modernizes the look of any garage.
- » Protects concrete columns from damage.

Customizable to fit any column!

- » Cuts easily to fit around poles, pipes and curbs.
- » Extensions available to fit flat walls and larger columns.

CUT

INSTALL

STRAP

Installation:

- » No tools required.
- » Modular tools interlock using the included key-lock system.
- » Can be mechanically attached to walls for added security.
- » Replacement pieces can be attached without replacing the entire structure.

LEGEND

AUSTRALIAN CONTENT

This product has been designed, developed and is either completely or substantially manufactured in Australia. (The minimum Australian content is between 50 and 100%).

NEW AND UNIQUE

This is a new and unique product. It has either been designed, developed and manufactured by the Barrier Group Pty. Ltd. or it is being seen here for the first time.

100% RECYCLABLE

This product is manufactured from virgin grade raw materials and is 100% recyclable using existing, readily available recycling technology and services.

RECYCLED MATERIALS

This product has been manufactured from either a combination of recycled materials and virgin grade materials or entirely from recycled materials.

HOT DIP GALVANISED

This product has been hot dip galvanised prior to any surface coatings being applied. Hot dip galvanised offers vastly improved corrosion protection and extended life in harsh environments.

FIXINGS INCLUDED

This product comes complete with all the necessary fixings to complete the standard installation. When comparing competitors prices against our own, always ensure they have included the fixings with the product (excludes gravel spikes).

5 YEAR WARRANTY

This product carries a 5 year limited warranty against structural failure due to faulty materials or workmanship in our manufactured products, OR structural failure and major fading due to U.V. degradation in our injection moulded products.
