

CABLE PROTECTORS 3 & 5 Channel

Moulded rubber cable protectors designed for the temporary protection of both assets from damage and pedestrians from tripping hazards. Available in either 3 or 5 channel designs. The bodies of these rugged cable protectors are manufactured from a combination of new and recycled rubber, while the hinged lids are tough flexible rubber/plastic composite in high visibility safety yellow. One metre modules, left or right hand 45° bends and end cap sets allow for flexibility when setting out. Recommended for short term, light duty vehicle and pedestrian traffic. Not recommended for forklift or truck traffic.

Value Features:

- » Available in 3 or 5 channel.
- » Robust construction.
- » Hinged lids for ease of use.
- » Provides safe passage to pedestrians.
- » Protects valuable cables and hoses.
- » Chunky interlocking connectors.
- » Flexible modular design.

1 metre body modules in 3 or 5 channel.
