

STEEL SPEED HUMP

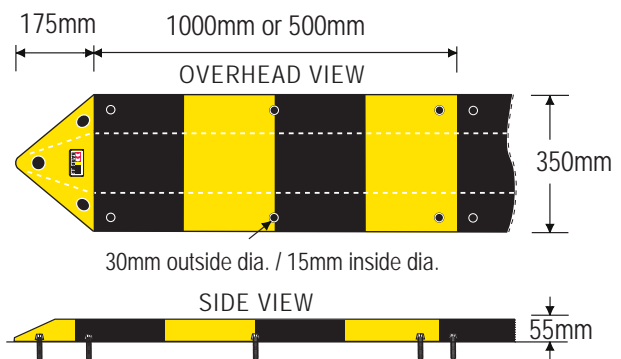

Slo-Motion Heavy Duty

Features:

- Designed to comply with AS/NZS 2890.1:2004.
- More than four times the load bearing contact area with the road surface than competitor's products.
- Use with or without steel end caps.
- Comes complete with all fixings.
- Truly independent modules for easy removal.
- **Does not need a rubber underlay to prevent rattle.**
- Concealed fixings remain accessible.
- Modules have a built in bridge design to accommodate hoses or cables.

Top skin:	6mm floor plate.
Length:	1 metre or 1/2 metre.
Width:	350mm.
Height:	55mm.
Ramp angle:	2:1.
Weight:	SM1000HD – 24.5kgs. SM500HD – 13kgs. SMSEC – 5kgs/pair (steel).
Fixings:	Masonry anchors (supplied).

Perfectly suited to heavy duty installations like transport depots, factories and terminals.
